

Thread Quiz

Total points 8/10

The respondent's email (**omkarkhade76@gmail.com**) was recorded on submission of this form.

✖ 1. What is the name of the method used to start a thread execution? 0/1

- ☐ init();
- ☐ start();
- ☒ run();
- ☐ resume()

✖

Correct answer

- ☒ start();

✓ 2. class X implements Runnable

1/1

```
{  
    public static void main(String args[])  
    {  
        /* Missing code? */  
    }  
    public void run() {}  
}
```

what is missing code?

- ☐ Thread t = new Thread(X);
- ☐ Thread t = new Thread(X); t.start();
- ☒ X run = new X(); Thread t = new Thread(run); t.start();
- ☐ Thread t = new Thread(); x.run();

✗ 3. Which cannot directly cause a thread to stop executing?

0/1

- ☒ Calling the SetPriority() method on a Thread object.
- ☐ Calling the wait() method on an object.
- ☐ Calling notify() method on an object.
- ☐ Calling read() method on an InputStream object.

Correct answer

- ☒ Calling notify() method on an object.

✓ 4. Which two of the following methods are defined in class Thread? 1/1

1.start()
2.wait()
3.notify()
4.run()
terminate()

☒ 1 and 4

☐ 2 and 3

☐ 3 and 4

☐ 2 and 4

✓ 5. Which method must be defined by a class implementing the java.lang.Runnable interface? 1/1

☐ void run()

☒ public void run()

☐ public void start()

☐ void run(int priority)

✓ 6. Which will contain the body of the thread?

1/1

- ☒ run();
- ☐ start();
- ☐ stop();
- ☐ main();

✓ 7. Which class or interface defines the wait(), notify(), and notifyAll() methods?

1/1

- ☒ Object
- ☐ Thread
- ☐ Runnable
- ☐ Class

✓ 8. public class MyRunnable implements Runnable

1/1

```
{  
    public void run()  
    {  
        // some code here  
    }  
}
```

which of these will create and start this thread?

- ☐ new Runnable(MyRunnable).start();
- ☐ new Thread(MyRunnable).run();
- ☒ new Thread(new MyRunnable()).start();
- ☐ new MyRunnable().start();

✓

✓ 9. In java a Thread can be created by

1/1

- ☐ A. Extending the thread class.
- ☐ B. Implementing Runnable interface.
- ☒ C. Both of the above
- ☐ D. None of these

✓

✓ 10. Analyze the following code:

1/1

```
public abstract class Test implements Runnable{  
    public void doSomething() { };  
}
```

- ☐ A. The program will not compile because it does not implement the run() method.
- ☐ B. The program will not compile because it does not contain abstract methods.
- ☒ C. The program compiles fine. ✓
- ☐ D. None of the above
