

COP and OS Mock 1

Total points 28/40 ?

The respondent's email (**maheshpatil9691@gmail.com**) was recorded on submission of this form.

✓ Which Linux command is used to delete a directory? *

1/1

- ☐ rm
- ☒ rmdir
- ☐ delete
- ☐ remove

✓ COW stands for? *

1/1

- ☒ Copy on write
- ☐ Convert on write
- ☐ Cut over write
- ☐ None of the above

PRN *

43

.....

✗ Multi-processor system gives a _____ *

0/1

- ☐ Small System
- ☐ Macro System
- ☐ Tightly Coupled System
- ☒ Loosely Coupled System

✗

Correct answer

- ☒ Tightly Coupled System

✓ What is the output of the below program? *

1/1

```
public class class1  
{  
    public static void main(String s[ ])  
    {  
        int x=0;  
        final int y=0;  
        x=25;  
        y=40;  
        System.out.println("X= "+x+" Y= "+y);  
    }  
}
```

- ☐ X= 25 Y= 40
- ☐ X= 0 Y= 0
- ☒ Compilation Error
- ☐ Runtime Error

✓ What will be the output of the following Java code? *

1/1

```
int arr[] = new int [5];  
System.out.print(arr);
```

- ☐ value stored in arr[0]
- ☐ 0
- ☐ 00000
- ☒ ClassName@hashcode (in hexadecimal form)

✓ Which of the following two operations are provided by the Inter Process Communication facility? *1/1

- ☒ Receive & send message
- ☐ Delete & receive message
- ☐ Send & delete message
- ☐ Write & delete message

✓ Messages sent by a process _____ *

1/1

- ☐ have to be of a fixed size
- ☒ can be fixed or variable sized
- ☐ have to be a variable size
- ☐ None of the above

✓ Signals are identified by _____ *

1/1

- ☐ Signal actions
- ☒ Signal identifiers
- ☐ Signal names
- ☐ Signal intervals

✗ The effect of a process being allocated all its resources before beginning its execution is _____ *0/1

- ☒ Very high resource utilization
- ☐ Low CPU utilization
- ☐ Low resource utilization
- ☐ None of the above

Correct answer

- ☒ Low resource utilization

✓ What is the output of the following program? *

1/1

```
public class opr {  
  
    public static void main(String[] args) {  
  
        System.out.print(8<<2);  
  
        System.out.print(",");  
  
        System.out.print(8>>2);  
  
    }  
  
}
```

- ☐ 16, 4
- ☒ 32, 2
- ☐ 8, 8
- ☐ 4, 16

✗ The _____ is the core of the operating system which virtualizes the common hardware resources of the computer to provide each process with its virtual resources. *0/1

- ☐ Job Scheduler
- ☐ Kernel
- ☐ Shell
- ☒ Process Scheduler

Correct answer

- ☒ Kernel

✓ The Zero Capacity queue _____ *

1/1

- ☒ is referred to as a message system with no buffering ✓
- ☐ is referred to as a message system with buffering
- ☐ is referred to as a link
- ☐ None of the above

✓ What will be the output of the following code snippet? *

1/1

```
int a=5,b,c,d,e;
```

```
b=a++;
```

```
c=++a;
```

```
d=a-c++;
```

```
e= --d;
```

```
System.out.println("A= "+a+"B= "+b+"C= "+c+"D= "+d+"E= "+e);
```

- ☐ A=5 B=6 C=6 D=-1 E=-1
- ☐ A=5 B=6 C= 5 D=2 E=1
- ☒ A=7 B= 5 C=8 D=-1 E=-1 ✓
- ☐ None of the above

Name *

Mahesh Patil

✓ What a virtual-memory miss is called? *

1/1

- ☒ Page fault
- ☐ Page miss
- ☐ Hit miss
- ☐ Page hit

✓ The main advantages of Linux include _____, _____ and _____ *

1/1

- ☒ Open-source, Secure, Stable
- ☐ User-Friendly, Secure, Shell Scripting
- ☐ User-friendly, Stable, Community Support
- ☐ None of the above

✗ The kernel is _____ of user threads. *

0/1

- ☐ The creator of
- ☐ Aware of
- ☐ Unaware of
- ☒ A part of

Correct answer

- ☒ Unaware of

✓ What will be the output of the following Java code? *

1/1

```
class name {  
    public static void main(String args[]) {  
        Object o1 = new Object();  
        System.out.print(o1.getClass());  
    }  
}
```

- ☐ Compilation Error
- ☐ Runtime Error
- ☐ Object
- ☒ class java.lang.Object

✗ Virtual memory, in memory hierarchy, consist of _____ and _____ *

0/1

- ☐ Disk, RAM
- ☒ Disk, ROM
- ☐ Cache and RAM
- ☐ Cache and Disk

Correct answer

- ☒ Disk, RAM

✗ When a child process exits before the parent process exits, which of the following is true? *0/1

- ☒ The child process becomes orphan ✗
- ☐ If the parent process does not handle SIGCHLD, the child process becomes a zombie
- ☐ The parent process becomes defunct
- ☐ None of the above

Correct answer

- ☒ The parent process becomes defunct

✓ CPU fetches the instruction from memory according to the value of _____ *1/1

- ☐ Instruction register
- ☒ Program counter ✓
- ☐ Status register
- ☐ None of the above

✓ _____ is the command used to create Linux File system * 1/1

- ☐ mount
- ☐ unmount
- ☒ mkfs ✓
- ☐ fsck

✓ At time of array initialization which is necessary to specify? *

1/1

- ☐ Row and Column
- ☒ Row
- ☐ Column
- ☐ None of the above

✓ What is the output of the following code? *

1/1

```
int [ ] x= {200,500,16};  
  
for(int i=0;i<x.length;i++)  
{  
    System.out.print(x[i]+" ");  
}
```

- ☐ 200
- ☒ 200 500 16
- ☐ compile error on 016
- ☐ None of the above

✗ What will be the output of the following Java program? *

0/1

```
class abc {  
  
    public static void main(String args[]) {  
  
        int var1 = 9;  
  
        int var2 = 10;  
  
        if ((var2 = 1) == var1)  
            System.out.print(var2);  
  
        else  
            System.out.print(++var2);  
  
    }  
}
```

- ☐ 1
- ☐ 10
- ☒ 11
- ☐ 2

✗

Correct answer

- ☒ 2

✗ The effective memory access time depends on _____ *

0/1

- ☐ Bit ratio
- ☐ Hit ratio
- ☒ Miss ratio
- ☐ None of the above

✗

Correct answer

- ☒ Hit ratio

✓ Process information in the current shell can be obtained by using *

1/1

- ☐ kill
- ☐ fork
- ☐ bg
- ☒ ps

✓

✗ In indirect communication between processes P and Q, _____ *

0/1

- ☒ there is another process R to handle and pass on the messages between P and Q ✗
- ☐ there is another machine between the two processes to help communication
- ☐ there is a mailbox to help communication between P and Q
- ☐ None of the above

Correct answer

- ☒ there is a mailbox to help communication between P and Q

✓ Main memory of the computer system is known to be *

1/1

- ☐ Non-volatile
- ☒ Volatile
- ☐ Restricted
- ☐ Locked

✓ What is the output of the following program? *

1/1

```
int main()
{
    fork();
    fork();
    fork();
    if (wait(0) == -1)
        printf("leaf child\n");
}
```

- ☒ 'leaf child' will be printed as 4 times
- ☐ 'leaf child' will be printed as 2 time
- ☐ 'leaf child will' will be printed as 5 times
- ☐ None of the above

✓ What is the main functionality of the command interpreter? *

1/1

- ☒ To get and execute the next user-specified command
- ☐ To provide the interface between the API and application program
- ☐ To handle the files in the operating system
- ☐ System service provider to the application programs

✓ How many of the following are legal declarations? *

1/1

[]double circle;

double[] triangle;

double square[];

double[] polynomial={10.3,34.8, 87.9};

- ☐ 1
- ☐ 2
- ☒ 3
- ☐ 4

✗ How programs act when the execution in background attempts to read from STDIN? *0/1

- ☒ It is terminated
- ☐ STDIN is made available to it
- ☐ Its execution is suspended
- ☐ None of these

✗

Correct answer

- ☒ Its execution is suspended

✓ What is the drawback of banker's algorithm? * 1/1

- ☐ In advance, processes rarely know how much resource they will need
- ☐ The number of processes changes as time progresses
- ☐ Resource once available can disappear
- ☒ All of the mentioned

✓

✓ Which statement causes the loop to immediately skips the current iteration and jump to the next iteration of the loop? *1/1

- ☐ exit(0)
- ☐ break
- ☐ jump
- ☒ continue

✓

✓ Multiprogramming of the computer system increases the utilization of _____ *1/1

- ☐ Memory
- ☒ CPU
- ☐ I/O
- ☐ Cost

✗ The strategies like the first fit, best fit and worst fit are used to select a _____. *0/1

- ☐ Process from a queue to put in storage
- ☐ Free hole from a set of available holes
- ☒ Process from a queue to put in memory
- ☐ None of the above

Correct answer

- ☒ Free hole from a set of available holes

✓ A set $\{P_0, P_1, \dots, P_n\}$ of waiting processes must exist such that P_0 is waiting for a resource held by P_1 , P_1 is waiting for a resource held by P_2 , ..., P_{n-1} is waiting for a resource held by P_n , and P_n is waiting for a resource held by P_0 . This condition for deadlock is referred to as _____ *1/1

- ☐ Mutual exclusion
- ☐ No preemption
- ☒ Circular wait
- ☐ Less resources

✓ _____ is the mechanism used for solving fragmentation *

1/1

- ☐ Paging
- ☐ Segmentation
- ☒ Compaction
- ☐ None of the above

✓ Which keyword can be used to prevent inheritance of a class? *

1/1

- ☐ abstract
- ☐ interface
- ☒ final
- ☐ const

✗ Which type of loop is best known for its "Boolean" condition that controls entry to the loop? *0/1

- ☐ do.....while()
- ☐ for()
- ☒ if()
- ☐ while()

Correct answer

- ☒ while()
