

DAC-Dotnet_midquiz

1. Which of the following statements is false?

1 point

- ☒ A. A struct does not allow inheritance.
- ☐ B. A struct cannot have a no parameter constructor
- ☐ C. A struct is a value type
- ☐ D. A struct is stored on the stack in memory.
- ☐ E. A struct cannot have methods.

2. Which of these statements is false?

1 point

- ☐ A. An abstract class need not have any abstract methods
- ☒ B. An abstract class cannot be instantiated
- ☐ C. A class that contains at least one abstract method needs to be marked as abstract
- ☐ D. A derived class must implement all abstract methods of an abstract base class or the derived class must be marked as abstract
- ☐ E. None of the above

3. App domains are

1 point

- ☐ A. The area in memory where an application runs
- ☒ B. The area inside a process where an application runs
- ☐ C. The area where the application has its domain

Time remaining: 00:01

☐ D. On the heap

4. What does `Array.IndexOf()` return if the item being searched is not found?

1 point

☐ A. null

☐ B. error

☐ C. Index of the last item + 1

☒ D. -1

5. Which of these statements is false?

1 point

☐ A. To override a function defined in the base class from the derived class the base class method must be a virtual method

☐ B. To override a function defined in the base class from the derived class we use the override keyword

☐ C. To override a function defined in the base class from the derived class the method signatures must be the same

☒ D. None of the above

6. CLS is

1 point

☐ A. a set of rules that all .net compilers follow

☐ B. a set of rules that are allowed for a .net language

☒ C. a set of rules that all .net languages must follow to be able to be called from other languages

☐ D. used for data types

Time remaining: 00:01

7. Which of these statements is false?

1 point

- ☒ A. A sealed class cannot be used as a base class
- ☐ B. A sealed class can be instantiated
- ☐ C. A sealed class cannot have virtual methods
- ☐ D. A sealed class cannot have abstract methods
- ☐ E. None of the above

8. Garbage collection happens at

1 point

- ☐ A. regular intervals
- ☒ B. when an object goes out of scope
- ☐ C. when the CLR decides
- ☐ D. at the end of the code execution

9. On compilation of CSharp source code, the output we get is

1 point

- ☐ A. byte code
- ☐ B. assembly
- ☒ C. IL
- ☐ D. MSIL

10. The following is an example of Unmanaged code

Time remaining: 00:01

1 point

- ☐ A. .net Code
- ☐ B. .net base classes
- ☐ C. code run by the clr
- ☒ D. code in windows dlls

11. Which of these statements is true?

1 point

- ☐ A. To overload a function defined in the base class from the derived class we use the overloads keyword
- ☐ B. To overload a function defined in the base class from the derived class we use the new keyword
- ☒ C. To overload a function defined in the base class from the derived class we use the override keyword
- ☐ D. None of the above

12. class BaseClass

1 point

```
{ int a;  
  
    public BaseClass(int a)  
  
    { this.a = a;}  
  
}  
  
class DerivedClass : BaseClass  
  
{ int b;
```

Time remaining: 00:01

```
public DerivedClass(int b)

{ this.b = b;}

}

class Program{

static void Main()

    { DerivedClass o = new DerivedClass(10);}

}
```

What is the value in o.a after running this code?

- ☐ A. 0
- ☒ B. 10
- ☐ C. null
- ☐ D. code will not compile.

13. `int [,] arr = new int[4,3];`

1 point

What will be the values for :

`arr.Rank, arr.GetLength(1), arr.GetUpperBound(0)`

Time remaining: 00:01

☐ A. 2, 3, 3

☐ B. 2, 4, 3

☒ C. 2, 3, 4

☐ D. 1, 3, 3

☐ E. 1, 4, 3

14. Which interface does ICollection<T> inherit from?

1 point

☐ A. IEnumerable

☒ B. IEnumerable<T>

☐ C. IList<T>

☐ D. IDictionary<T>

☐ E. None of the above

15. Which of the following is true for a static class?

1 point

☐ A. It can only contain static methods

☐ B. It cannot be instantiated

☐ C. It cannot be used as a base class

☒ D. All of the above

☐ E. None of the above

Time remaining: 00:01

16. When is the static constructor called?

1 point

- ☒ A. whenever an object is created
- ☐ B. when the class is loaded
- ☐ C. when Main is called
- ☐ D. whenever a static method is called

17. What is the default access specifier for members in a class?

1 point

- ☐ A. internal
- ☐ B. public
- ☒ C. private
- ☐ D. protected

18. char variables occupy ____ bytes

1 point

- ☐ A. 1
- ☒ B. 2
- ☐ C. 0
- ☐ D. 4

19. In generics, what constraint means that T can only be a value type?

1 point

- ☐ A. where T: value

Time remaining: 00:01

☐ B. where T: valueType

☒ C. where T: struct

☐ D. where T: class

20. Which statement is true?

1 point

☐ A. ref variables need not have an initial value

☐ B. ref variables lose their initial value when they enter the function

☒ C. you must initialise a ref variable before control leaves the function

☐ D. ref variables cannot be used in the function before they are initialised

☒ E. None of the above

21. What is the base class of all classes if no class has been specified as the base class?

1 point

☐ A. Nothing

☐ B. ToString()

☐ C. base

☒ D. Object

22. Which statement is false?

1 point

☐ A. out variables need not have an initial value

☒ B. out variables lose their initial value when they en

Time remaining: 00:01

- ☐ C. you must initialise an out variable before control leaves the function
- ☐ D. out variables cannot be used in the function before they are initialised
- ☒ E. None of the above

23. Which of these statements is true?

1 point

- ☒ A. In late binding, we declare an object of the base class and allocate memory for a derived class
- ☒ B. In late binding, we declare an object of the derived class and allocate memory for a base class
- ☐ C. In late binding, we cannot declare an object of the base class and allocate memory for a sub-derived class
- ☐ D. In late binding, we need not have any virtual methods in the base class
- ☐ E. None of the above

24. Which of these is correct for the explicit implementation of an interface?

1 point

- ☐ A. `public void Method1(){}`
- ☐ B. `void Method1(){}`
- ☒ C. `public void InterfaceName.Method1(){}`
- ☒ D. `void InterfaceName.Method1(){}`

25. How do you declare a nullable int?

1 point

- ☐ A. `Nullable int a;`
- ☐ B. `int a = null;`

Time remaining: 00:01

☒ C. int? a;

☐ D. int?? a;

26. Jit compilation converts

1 point

☐ A. IL to MSIL

☐ B. MSIL to IL

☐ C. source code to IL

☒ D. source code to native code

☒ E. none of the above

27. Which of these statements is true?

1 point

☐ A. To hide a function defined in the base class from the derived class we use the overloads keyword

☒ B. To hide a function defined in the base class from the derived class we use the new keyword

☐ C. To hide a function defined in the base class from the derived class we use the override keyword

☐ D. To hide a function defined in the base class from the derived class we use the sealed keyword

☒ E. None of the above

28. What is the default access specifier for a class declared in a namespace?

1 point

☒ A. internal

☐ B. public

Time remaining: 00:01

- ☐ C. private
- ☐ D. protected

29. Give the CTS type for float

1 point

- ☒ A. System.Float
- ☐ B. System.Decimal
- ☐ C. System.Single
- ☐ D. System.Double

30. Which class is used to iterate thru a SortedList<TKey,TValue>?

1 point

- ☐ A. DictionaryEntry
- ☐ B. DictionaryEntry<TKey,TValue>
- ☒ C. KeyValuePair
- ☐ D. KeyValuePair<TKey,TValue>
