

Web Java - JDBC 1

Total points 8/10 ?

The respondent's email (omjbhaleraowork@gmail.com) was recorded on submission of this form.

Name *

om Bhalerao

Last TWO digits of PRN *

48

✓ How many JDBC driver types are available? *

1/1

☐ 1

☐ 2

☐ 3

☒ 4

✓ JDBC stands for? *

1/1

☐ Java Database Connect

☒ Java Database Connectivity

☐ Jjson Database Connectivity

☐ Jjson Database Connect

✓ What are the major components of the JDBC? *

1/1

- ☒ DriverManager, Driver, Connection, Statement, and ResultSet
- ☐ DriverManager, Driver, Connection, and Statement
- ☐ DriverManager, Statement, and ResultSet
- ☐ DriverManager, Connection, Statement, and ResultSet

✗ Which packages contain the JDBC classes? *

0/1

- ☐ java.jdbc and javax.jdbc
- ☒ java.jdbc and java.jdbc.sql
- ☐ java.sql and javax.sql
- ☐ java.rdb and javax.rdb

Correct answer

- ☒ java.sql and javax.sql

✓ How can you retrieve information from a ResultSet? *

1/1

- ☐ By invoking the method get(..., String type) on the ResultSet, where type is the database type
- ☐ By invoking the method get(..., Type type) on the ResultSet, where Type is an object which represents a database type
- ☐ By invoking the method getValue(...), and cast the result to the desired Java type.
- ☒ By invoking the special getter methods on the ResultSet: getString(...), getBoolean (...), getClob(...),...

✗ How can you execute DML statements (i.e. insert, delete, update) in the database? *0/1

- ☒ By making use of the InsertStatement, DeleteStatement or UpdateStatement classes ✗
- ☐ By invoking the execute(...) or executeUpdate(...) method of a normal Statement object or a sub-interface object thereof
- ☐ By invoking the executeInsert(...), executeDelete(...) or executeUpdate(...) methods of the DataModificationStatement object
- ☐ By making use of the execute(...) statement of the DataModificationStatement object

Correct answer

- ☒ By invoking the execute(...) or executeUpdate(...) method of a normal Statement object or a sub-interface object thereof

✓ What must be the first characters of a database URL? * 1/1

- ☐ db,
- ☐ db:
- ☐ jdbc,
- ☒ jdbc: ✓

✓ Which of these obtains a Connection? * 1/1

- ☐ Connection.getConnection(url)
- ☐ Driver.getConnection(url)
- ☒ DriverManager.getConnection(url) ✓
- ☐ new Connection(url)

✓ Which is responsible for getting a connection to the database? * 1/1

- ☒ Driver
- ☐ Connection
- ☐ Statement
- ☐ ResultSet

✓ What is the output when run with a JDBC 4.0 driver if the "demo" database exists and contains an empty "users" table? *1/1

```
String url = "jdbc:derby:demo";  
try (Connection conn = DriverManager.getConnection(url);  
Statement stmt = conn.createStatement();  
ResultSet rs = stmt.executeQuery("select count(*) from users"))  
{ System.out.println(rs.getInt(1)); }
```

- ☐ 0
- ☐ 1
- ☐ The code does not compile.
- ☒ The code compiles but throws an exception at runtime.
