✓ When does Exceptions in Java arises in code sequence? *

1/1

- ☒ Run Time
- ☐ Compilation Time
- ☐ Can Occur Any Time
- ☐ None of the mentioned

✗ Which of these keywords is not a part of exception handling? *

0/1

- ☒ try
- ☐ finally
- ☐ thrown
- ☐ catch
- ☐ All of the above

✗

Correct answer

- ☒ thrown

✗ Which of these keywords must be used to monitor for exceptions? *

0/1

- ☐ try
- ☐ finally
- ☒ throw
- ☐ catch

✗

Correct answer

- ☒ try

✓ Which of these keywords must be used to handle the exception thrown by ^{*}1/1 try block in some rational manner?

- ☐ try
- ☐ finally
- ☐ throw
- ☒ catch

✓ Which of these keywords is used to manually throw an exception? ^{*} 1/1

- ☐ try
- ☐ finally
- ☒ throw
- ☐ catch

✗ Which exception will the following throw? *

0/1

```
public class Test {  
  
    public static void main(String[] args) {  
        Object obj = new Integer(3);  
        String str = (String) obj;  
        System.out.println(str);  
    }  
}
```

- ☐ ArrayIndexOutOfBoundsException
- ☐ ClassCastException
- ☐ IllegalArgumentException
- ☒ NumberFormatException
- ☐ None of the above.

✗

Correct answer

- ☒ ClassCastException

✓ Which of the following are checked exceptions? (Choose all that apply) * 1/1

- ☒ Exception ✓
- ☐ IllegalArgumentException
- ☒ IOException ✓
- ☐ NullPointerException
- ☐ NumberFormatException
- ☐ StackOverflowError

✗ Which of the following exceptions are thrown by the JVM? (Choose all that apply) *0/1

- ☐ ArrayIndexOutOfBoundsException
- ☐ ExceptionInInitializerError
- ☒ java.io.IOException ✗
- ☐ NullPointerException
- ☐ NumberFormatException

Correct answer

- ☒ ArrayIndexOutOfBoundsException
- ☒ ExceptionInInitializerError
- ☒ NullPointerException

✓ The class at the top of exception class hierarchy is_____*

1/1

- ☐ ArithmeticException
- ☒ Throwable
- ☐ Exception
- ☐ Object

✗ Which keyword is used to specify the exception thrown by method? *

0/1

- ☐ catch
- ☐ throws
- ☐ finally
- ☒ throw

Correct answer

- ☒ throws

✓ Which of the following blocks execute compulsorily whether exception is caught or not. *1/1

- ☒ finally
- ☐ catch
- ☐ throws
- ☐ throw

✗ What happen in case of multiple catch blocks? *

0/1

- ☒ Either super or subclass can be caught first. ✗
- ☐ The superclass exception must be caught first.
- ☐ The superclass exception should not be caught first.
- ☐ None of these

Correct answer

- ☒ The superclass exception should not be caught first.

✓ If exception condition is not handled explicitly in a java program, then in case of occurrence of an exception, the uncaught exception will be handled by *1/1

- ☒ main thread's default exception handler. ✓
- ☐ It will never be handled and the program ends abruptly.
- ☐ None of the above

✓ A checked exception is the one that: * 1/1

- ☒ Needs to be dealt with explicitly by the method either by using try-catch or by propagating the exception to the caller ✓
- ☐ Need not have to be dealt with explicitly by the method.
- ☐ None of the above

✗ Which statement is true? *

0/1

- ☒ An Error that might be thrown in a method must be declared as thrown by that method, or be handled within that method. ✗
- ☐ Multiple catch statements can catch the same class of exception more than once.
- ☐ Except in case of VM shutdown, if a try block starts to execute, a corresponding finally block will always start to execute.
- ☐ None of the above

Correct answer

- ☒ Except in case of VM shutdown, if a try block starts to execute, a corresponding finally block will always start to execute.

✓ Which exception is thrown when divide by zero statement executes? *

1/1

- ☐ NumberFormatException
- ☐ NullPointerException
- ☒ ArithmeticException
- ☐ None of these

✓

✗ What is the output of this program? *

0/1

```
class Main
{
    public static void main(String args[])
    {
        try
        {
            System.out.print("Hello" + " " + 1 / 0);
        }
        catch(ArithmeticException e)
        {
            System.out.print("World");
        }
    }
}
```

- ☐ Hello
- ☐ World
- ☐ HelloWorld
- ☒ Hello World

✗

Correct answer

- ☒ World

✓ What is the output of this program? *

1/1

```
class Main
{
    public static void main(String args[])
    {
        try
        {
            int a, b;
            b = 0;
            a = 5 / b;
            System.out.print("A");
        }
        catch(ArithmeticException e)
        {
            System.out.print("B");
        }
        finally
        {
            System.out.print("C");
        }
    }
}
```

- ☐ A
- ☐ B
- ☐ AC
- ☒ BC

✗ Predict the output of following Java program *

0/1

```
class Main {  
    public static void main(String args[]) {  
        try {  
            throw 10;  
        }  
        catch(int e) {  
            System.out.println("Got the Exception " + e);  
        }  
    }  
}
```

- ☒ Got the Exception 10
- ☐ Got the Exception 0
- ☐ Compiler Error
- ☐ None

✗

Correct answer

- ☒ Compiler Error

✓ Which of the following statements is true about exception handling in Java:

*1/1

- ☒ A try block can have many catch blocks but only one finally block
- ☐ A try block can have many catch blocks and many finally blocks
- ☐ A try block must have one finally block for each catch block
- ☐ A try block must have at least one catch block to have a finally block
