✓ 1. What is an index in MySQL? *

1/1

- ☐ An index is a special data type in MySQL that stores multiple values.
- ☐ An index is a reserved keyword in MySQL that cannot be used as a table or column name.
- ☒ An index is a database object that is used to speed up the data retrieval process. ✓
- ☐ An index is a database object that is used to enforce referential integrity.

✓ 2. Which of the following is correct CREATE INDEX Command? *

1/1

- ☐ INSERT INDEX index_name ON table_name;
- ☐ INSERT INDEX index_name ON database_name;
- ☐ CREATE INDEX index_name ON database_name;
- ☒ CREATE INDEX index_name ON table_name; ✓

✓ 3. Which of the following is correct DROP INDEX Command? * 1/1

- ☐ DROP INDEX table_name;
- ☒ DROP INDEX index_name;
- ☐ DROP INDEX index_name or table_name;
- ☐ DELETE INDEX index_name;

✓ 4. Indexes can also be unique? * 1/1

- ☒ Yes
- ☐ No
- ☐ Maybe
- ☐ None of the above

✓ 5. What is the syntax for Single-Column Indexes? * 1/1

- ☐ ALTER INDEX index_name ON table_name (column_name);
- ☐ CREATE SINGLE-COLUMN INDEX index_name ON table_name (column_name);
- ☐ CREATE INDEX SINGLE-COLUMN index_name ON table_name (column_name);
- ☒ CREATE INDEX index_name ON table_name (column_name);

✓ 6. What is a view in MySQL? *

1/1

- ☐ A temporary table that stores the results of a query
- ☐ A table that stores metadata about the database schema
- ☒ A virtual table that is used for information security and encapsulation purpose. ✓
- ☐ d) A function that performs calculations on data in a column

✓ 7. How is a view created in MySQL? *

1/1

- ☐ By creating a separate table with the desired columns and data
- ☒ By using the CREATE VIEW statement to define a SELECT query that retrieves data from one or more tables ✓
- ☐ By using the INSERT INTO statement to populate a new table with data from an existing table
- ☐ By using the UPDATE statement to modify data in an existing table

✓ 8. What is a complex view or Non-updatable view in MySQL? *

1/1

- ☐ A view that is difficult to create and maintain
- ☒ A view that joins multiple tables or uses complex expressions like limit, group by etc.. in the SELECT statement ✓
- ☐ A view that contains more than 100 rows of data
- ☐ A view that is used to display data from the system tables

✓ 9. What does ACID stand for in the context of database management systems? *1/1

- ☐ Automated Control of Intra-Database processes
- ☒ Atomicity, Consistency, Isolation, Durability
- ☐ Advanced Configuration for In-Database scaling
- ☐ None of the above

✓ 10. Which of the following is an example of the atomicity property? * 1/1

- ☒ A transaction that updates multiple tables is either fully completed or fully rolled back
- ☐ A database stores only valid and accurate data
- ☐ Multiple transactions can occur concurrently without interfering with each other
- ☐ A transaction that is committed will remain committed even in the event of a system failure
