

MS.Net QUIZ- 6

Total points 12/12

The respondent's email (**omjbhaleraowork@gmail.com**) was recorded on submission of this form.

✓ 1. What is a delegate in C#? *

1/1

- ☒ A reference type that holds a reference to a method. ✓
- ☐ A type used to define a class.
- ☐ An object-oriented feature in C#.
- ☐ A data structure used to store multiple values.

✓ 2. What is general form of a delegate declaration? *

1/1

- ☐ access_specifier delegate name_of_delegate;
- ☐ delegate name_of_delegate(parameter-list);
- ☒ access_specifier delegate return-type name_of_delegate(parameter-list); ✓
- ☐ None of the above.

✓ 3. Which of the following is NOT a valid delegate type in C#? *

1/1

- ☐ Action
- ☐ Func
- ☐ Predicate
- ☒ String ✓

- ✓ 4. Choose the correct option according to the given statements. *1/1
- Statement 1: delegate can be used to call only those methods that signature and return type are same as delegate.
- Statement 2: A delegate cannot refer to a static method.
- Statement 3: A delegate can refer to a static method.
- ☐ Statement 1 and 2 are correct.
- ☐ Only statement 2 is correct.
- ☒ Statement 1 and 3 are correct. ✓
- ☐ Only statement 3 is correct.

- ✓ 5. What is multicast delegate in C#? *1/1
1. Multicasting is the ability to create an invocation list, or chain, of methods that will be automatically called when a delegate is invoked.
2. A delegate that can hold only one method reference.
3. += operator is used to add methods to the chain for multicasting.
4. -= operator is used to remove methods from the chain.
- ☐ Only statement 1 and 2 are correct.
- ☐ Only statement 2 is correct.
- ☒ Only statement 1 3 and 4 correct. ✓
- ☐ All statements are correct.

- ✓ 6. A method is written as follows. Choose the correct code for delegate declaration to call below function. *1/1

```
string DemoFunction(string s)
{
    -----
    -----
}
```

- ☐ delegate string name_of_delegate (string s, string str);
- ☒ delegate string name_of_delegate (string s); ✓
- ☐ string name_of_delegate (string str);
- ☐ None of the above.

- ✓ 7. Choose the correct option according to the given statements about events and delegates. *1/1

- ☐ events can be multicast.
- ☐ delegate can be multicast.
- ☐ events cannot be multicast.
- ☒ Option A and B are correct ✓

- ✓ 8. All exception classes are derived from which built-in class? * 1/1

- ☒ Exception ✓
- ☐ Finally
- ☐ SystemException.
- ☐ None of the above.

✓ 9. Which of the following statements is correct about an Exception? * 1/1

- ☐ It occurs at compile time.
- ☒ It occurs at run-time.
- ☐ It occurs at load time.
- ☐ None of the above.

✓ 10. Trace the output of given below code. * 1/1

```
class MyProgram
{
    static void Main(string[] args)
    {
        int val = 100;
        int[] a = new int[5];
        try
        {
            a[6] = val;
        }
        catch (IndexOutOfRangeException e)
        {
            Console.WriteLine ("Index out of bounds");
        }
        Console.WriteLine("Welcome at careerRide.");
    }
}
```

- ☐ Index out of bounds.
- ☐ Welcome at careerRide.
- ☒ Index out of bounds Welcome at careerRide.
- ☐ None of the above.

✓ 11. Choose the correct option according to given below statement. *1/1

Statement 1: User-defined exceptions can be created.

Statement 2: All types of exceptions can be caught using the Exception class.

Statement 3: User-defined exceptions cannot be created.

☒ Statement 1 and 2 are correct. ✓

☐ Only statement 3 is correct.

☐ Statement 2, and 3 are correct.

☐ Only Statement 1 is correct.

✓ 12. Trace the output of given below code. * 1/1

```
using System;

class MyProgram
{
    static void Main(string[] args)
    {

        try
        {
            Console.WriteLine("Welcome to careerRide");
        }

    }
}
```

☐ Welcome to careerRide

☒ Compile time error ✓

☐ Run time error.

☐ None of the above.
