✓ 1. What is the purpose of the virtual keyword in C#? *

1/1

- ☐ It is used to declare a new method in a derived class.
- ☐ It is used to prevent a method from being overridden.
- ☒ It is used to allow a method to be overridden in a derived class.
- ☐ It is used to hide a method from being inherited.

✓ 2. Which keyword is used to declare that a method in a derived class is intended to override a virtual method in the base class? *1/1

- ☒ override
- ☐ virtual
- ☐ new
- ☐ base

✓ 3. What is the purpose of the new keyword in C#? *

1/1

- ☐ It is used to declare a new method in a derived class.
- ☐ It is used to prevent a method from being overridden.
- ☐ It is used to allow a method to be overridden in a derived class.
- ☒ It is used to explicitly hide a member inherited from a base class.

✓ 4. What is the purpose of a sealed class in C#? *

1/1

- ☒ It restricts the inheritance of the class.
- ☐ It allows only one instance of the class to be created.
- ☐ It prevents the instantiation of the class.
- ☐ It restricts access to the class members.

✓ 5. Reference types stores actual data in which memory location? *

1/1

- ☐ Main memory
- ☐ Stack
- ☐ Secondary Storage
- ☒ Heap

✓ 6. Structure/struct comes under which type? *

1/1

- ☒ Value type
- ☐ Reference type
- ☐ Derived type
- ☐ None of the above.

✓ 7. What is the difference between a value type and a reference type in C#? *1/1

- ☐ Value types are stored on the heap, while reference types are stored on the stack
- ☐ Value types cannot be null, while reference types can
- ☐ Reference types cannot be null, while value types can
- ☒ Value types are stored on the stack, while reference types are stored on the heap

✓ 8. What is the access modifier for a class member that can only be accessed within the same class? *1/1

- ☐ public
- ☒ private
- ☐ internal
- ☐ protected

✓ 9. Trace the output of given below code. *

1/1

```
using System;
interface IDemo
{
    int x = 10;
}
class Program
{
    static void Main(string[] args)
    {
        Console.WriteLine("Welcome at careerRide");
    }
}
```

- ☐ Welcome at careerRide
- ☒ Compile time error.
- ☐ Run time error
- ☐ None of the above.

✓ 10. Which of the following can be declared (without implementation) in an interface? *1/1

- ☒ events, indexers, methods, and properties.
- ☐ Only methods
- ☐ Only methods, and properties.
- ☐ None of the above.

- ✓ 11. Which of the following is the correct implementation of the interface *1/1
given below used in C#.NET?

```
interface IDemo
{
void myFunction(int x);
}
```

```
A) class SampleClass : IDemo
{
public void myFunction()
{
// some code
}
}
```

☐ Option 1

```
B) class SampleClass implements IDemo
{
public int myFunction(int x)
{
// some code
}
}
```

☐ Option 2

☐ None of the Above

```
C) class SampleClass : IDemo
{
public void myFunction(int x)
{
// some code
}
}
```

☒ Option 3

✓ 12. Which of the following statements is correct? *

1/1

- ☐ The methods declared in interface are by default sealed.
- ☒ The methods declared in interface are by default public and abstract. ✓
- ☐ The methods declared in interface are by default private.
- ☐ None of the above.

✓ 13. Choose the correct option about the C#.NET code snippet given below?

*1/1

```
interface IMyInterface
{
    void function1();
    void function2();
}
class MyClass : IMyInterface
{
    void function1()
    {
        // Some code
    }
}
```

- ☐ Run time exception
- ☐ Console.WriteLine("Welcome at CareerRide.com");
- ☒ It will give compile time error as: 'MyClass' does not implement interface member IMyInterface.function2(). ✓
- ☐ None of the above.

✓ 14. According to given below statements, choose the correct option regarding boxing and unboxing. *1/1

Statement 1: Boxing converts a value type to a reference type.

Statement 2: Unboxing converts a reference type to a value type.

Statement 3: Unboxing converts a value type to a reference type.

Statement 4: Boxing converts a reference type to a value type.

☒ Statement 1 and 2 are correct.

☐ Statement 3 and 4 are correct.

☐ Statement 1 and 3 are correct.

☐ Statement 2 and 4 are correct.

✗ 15. According to the given statement, choose the correct option about an interface used in C#.NET. *0/1

Statement 1: A class can implement multiple interfaces.

Statement 2: Structures cannot inherit a class but can implement an interface.

Statement 3: An interface can implement multiple classes.

Statement 4: A class can implement only one interface.

☒ Only statement 1 is correct.

☐ Statement 1 and statement 2 are correct.

☐ Statement 3 and statement 4 are correct.

☐ Only statement 4 is correct.

Correct answer

☒ Statement 1 and statement 2 are correct.
